Partner

LynX IT

Land: Polen

LynX IT is the materialization of the consequences, vision, enthusiasm and knowledge of a group of people. We have over 15 years' experience gained in sales of hardware, software and consulting services in the area of IT, including business development, business and functional analysis, development and maintenance of IT architecture, implementation standards and methodologies, and IT project management.

During our years of experience we had been cooperating with clients in industries such as: retail and wholesale, banking and insurance, telecommunications and energy. Our long-term relationships with customers and partners are based on the cooperation in an atmosphere of mutual trust, which is the basis for the development of both, our customers and business partners and LynX IT also.

Our main goal is to build a company characterized by flexibility and efficiency, based on close cooperation with the proven network of trusted business partners.

We provide a unique combination of knowledge and experience of two different IT areas:

- sales of hardware, software and comprehensive IT solutions
- consulting and implementation IT services

Such areas allows us, together with our partners, deliver a wide range of supplies and services capable of meeting the diverse and often complex business challenges of our customers. Business relationships developed during years, ability to cooperate with foreign partners and market knowledge have enabled us to create a company with competence cooperation with a variety of clients in terms of type and size of business conducted by them, as well as partners from different cultural areas.
