## tradesolutions AG

Country: Switzerland, Italy, France

The tradesolutions AG sees itself as an integrator of multi-level world of ERP systems through the POS system, in particular as a consultant for analyzing and optimizing your systems (modeling and sizing) and as a service provider for all POS, including services from the cloud (POSaaS).

The core topics include designing leaner, more flexible and transparent POS solutions, the realization of coherent ERP data flows to the POS system and mobile MDE device, the implementation of modern e-payment and e-loyalty and digital signage solutions in a certified partner network and support to discovery and realization of modern business models of the store and online operations in retail.

Many years of expertise in the Swiss retail trade as well as strategic partnerships with leading manufacturers and suppliers make tradesolutions to the competent partner for designing leaner, more flexible and transparent POS solutions.
